Luis W. Blanco D.

Software Developer

Software developer with over 2 years of experience, specializing in creating scalable and efficient solutions for web and mobile applications. I am passionate about implementing best development practices to deliver high-quality products. I constantly seek to learn new tools and methodologies that drive productivity and innovation. My focus on solving complex problems and my commitment to continuous improvement make me a valuable asset to any team.

Experience

2024 - 2025

Cencosud | Conglomerate of retail companies.

Desarrollador Web y Mobile

I participate in the maintenance and improvement of the web platforms and mobile applications of Cencosud stores, working as a developer in both areas. My work includes code optimization, improving the efficiency and structure of the applications to ensure their performance and scalability. Additionally, I focus on implementing new functionalities, making adjustments to UI/UX interfaces, and fixing bugs, ensuring a smooth user experience aligned with the company's business needs. This effort has allowed the platforms to remain updated and in tune with the business objectives.

2023

Boxtool | Kalisch Steel Hardware Division.

Desarrollador Web VTEX IO

I contributed from the beginning to the creation of the Boxtool MX website as a frontend developer, working closely with the client and the design and development teams. My focus was on building a functional and visually appealing platform, prioritizing an optimal user experience. I implemented interactive interfaces using modern frontend technologies, ensuring smooth navigation and a responsive design perfectly adapted to various devices.

2023

Grupo Elektra e Italika | retail trade and motorcycle brand.

Desarrollador Web

I collaborated as a frontend developer in the maintenance and customization of the web platforms for Elektra and Italika. During my time on these projects, I worked on implementing adjustments and improvements requested by the client, following the guidelines of the team. I ensured that the platforms maintained their performance and adaptability.

2022

Daviplata Marketplace | digital e-commerce platform.

Desarrollador Web y Mobile

I participated in the creation of the marketplace application for DaviPlata, working as a Frontend Developer. I collaborated with a multidisciplinary team to develop an efficient and user-friendly platform that allows users to make online purchases using their DaviPlata accounts. I was responsible for implementing user interfaces that provided a clear and seamless experience. To manage the logic, functionality, and information from the client side, I worked on the VTEX APIs integrated into the marketplace. I contributed to the successful delivery of the application within the scheduled timeframe, meeting the end-user requirements.
