- Next.js
- Node.js
- Express - Nest
- SQL - No-SQL
- Git & GitHub
- Figma
- Vtex IO - Ecommerce

Colombia

Experiencia

2024 - 2025.
Cencosud | Retail business conglomerate.
Web and Mobile Developer

I participate in the maintenance and improvement of the web platforms and mobile applications of Cencosud stores (Jumbo and Easy.), working as a developer in both areas. My work includes code optimization, improving the efficiency and structure of the applications to ensure their performance and scalability. In addition, I focus on implementing new features, making adjustments to UI/UX interfaces, and fixing bugs, ensuring a smooth user experience aligned with the company's business needs. This effort has helped keep the platforms up to date and in sync with business objectives.

2023
Boxtool | Hardware division of Kalisch Steel.
VTEX IO Web Developer

I contributed from the beginning to the creation of the Boxtool MX website as a frontend developer, working closely with the client and the design and development teams. My focus was on building a functional and visually appealing platform, prioritizing an optimal user experience. I implemented interactive interfaces using modern frontend technologies, ensuring smooth navigation and a responsive design perfectly adapted to different devices.

2023
Elektra and Italika Group | Retail business and motorcycle brand.
Web Developer

I collaborated as a frontend developer in the maintenance and customization of the web platforms of Elektra and Italika. During my time on these projects, I worked on implementing adjustments and improvements requested by the client, following the guidelines of the work team, ensuring that the platforms maintained their performance and adaptability.

2022
Daviplata Marketplace | Digital e-commerce platform.
Web and Mobile Developer

I participated in the creation of the marketplace application for Daviplata, working as a Frontend Developer. I collaborated with a multidisciplinary team to develop an efficient and easy-to-use platform that allows users to make online purchases with their Daviplata accounts. I was in charge of implementing user interfaces that offered a clear and smooth experience. To manage the logic, functionality, and information from the client side, I worked on the VTEX APIs integrated into the marketplace. I contributed to the successful delivery of the application within the scheduled timeframe, meeting the end-user requirements.
